Horse record template

HestOS

One horse. A profile, a record log and a separate action plan.

Use one copy per horse. Enter information you can confirm. Write "To confirm" for missing details rather than guessing. Dates: YYYY-MM-DD.

Keep original passport and veterinary documents. This working copy does not replace them or set a care schedule.

Completed records

HestOS

One horse. A profile, a record log and a separate action plan.

Record what actually happened. Keep future work in Next actions. Include the source and who entered each record. Dates: YYYY-MM-DD.

Horse name

Stable ID

Event date	Category	What happened / outcome	Professional / source	Entered by	Entry date	Document location / reference

Use the actual event date and a separate entry date. If details are unconfirmed, say so. Do not turn an appointment into a completed record.

Next actions

HestOS

One horse. A profile, a record log and a separate action plan.

Give each next step an agreed date and a responsible person. A planned appointment is not a completed event. Dates: YYYY-MM-DD.

Horse name

Stable ID

Planned date	Action	Responsible person	Status	Completed on	Related record / source	Notes

When work is done, enter the completion date and add the factual outcome to Completed records. Record the source or event reference.
